Galerie-Informationen | Gallery Information

The objective of PROGRAM Gallery is to leave a trace in the viewers' awareness by focusing their attention on the issues of contemporary art. The reality of modern times forces the artist to leave the quiet of their studio and to abandon customary imaging techniques. In order to create a noticeable visual message the artist often refers to mass culture by adapting the seductive mechanisms of advertising and by using electronic media as well as other media «borrowed» from surroundings. PROGRAM promotes art made using various means of expression: from slide shows and video projections to photography and installations. The Gallery is open to new artistic trends and phenomena. It establishes close contacts with the viewers through its dedicated profile and high quality program which presents current, critical and involved art that is searching for new methods of communication.

Staff

Marcin Muszyński (Chairman)
